

PREVENTION REWARDS PROGRAM

GET YOUR CLEANINGS. RECEIVE YOUR REWARD!

Preventive dental care is important to your overall health and will help prevent costly dental work in the future. To encourage you to receive preventive services, we will pay \$20 for each family member enrolled with Dominion National who receives two cleanings from a network dentist during the plan year. For example, that's \$80 for a family of four enrolled members who each receive two cleanings from a participating Dominion network dentist within the plan year.

No additional action will be required on your part to receive the reward as we will automatically send the primary subscriber the reward check for members who qualify. Simply make your semi-annual teeth cleaning appointments and ask your dentist to submit a claim for your cleaning. If your dentist does not submit your claim, you will be provided an opportunity to receive this reimbursement at the end of the plan year through the customer satisfaction survey.

While the customer satisfaction survey is not required to receive your Prevention Rewards, we encourage you to take a couple of minutes to complete it so that we may evaluate our services, share feedback with our providers and identify areas to better serve you.
